**LISTING OF CLAIMS**

Claim 1 (Currently amended). An infant sleep support device comprising:  
an adjustable strap member; and  
a plurality of movement restrictors releasably securable to said adjustable strap member;  
and  
wherein said plurality of movement restrictors are positioned in an orientation that  
permits an infant to be positioned on its back between said movement restrictors.

Claim 2 (Original). The infant sleep support device of claim 1 wherein said plurality of movement restrictors is releasably securable to said adjustable strap member by hook and loop fasteners.

Claim 3 (Original). The infant sleep support device of claim 1 wherein said plurality of movement restrictors is releasably securable to said adjustable strap member by snaps.

Claim 4 (Original). The infant sleep support device of claim 1 wherein said plurality of movement restrictors is inflatable.

Claim 5 (Currently amended). An infant sleep support device comprising:  
a clothing article;

a first attachment member positioned on an exterior of said clothing article;  
a second attachment member positioned on said exterior of said clothing article opposite said first attachment member;  
a first movement restrictor having a third attachment member for releasably engaging said first attachment member on said exterior of said clothing article; and  
a second movement restrictor having a fourth attachment member for releasably engaging said second attachment member on said exterior of said clothing article.

Claim 6 (Original). The infant sleep support device of claim 5 wherein said third attachment member is releasably engaged to said first attachment member by a hook and loop fastener.

Claim 7 (Original). The infant sleep support device of claim 5 wherein said third attachment member is releasably engaged to said first attachment member by a snap.

Claim 8 (Original). The infant sleep support device of claim 5 wherein said forth attachment member is releasably engaged to said first attachment member by a hook and loop fastener.

Claim 9 (Original). The infant sleep support device of claim 5 wherein said forth attachment member is releasably engaged to said first attachment member by a snap.

Claim 10 (Original). The infant sleep support device of claim 5 wherein said first movement restrictor is inflatable.

Claim 11 (Original). The infant sleep support device of claim 5 wherein said second movement restrictor is inflatable.

Claim 12 (Currently amended). A method for forming an infant sleep support, said method including the steps of:

attaching a first attachment member to an exterior of a clothing article;  
attaching a second attachment member to ~~the~~ said exterior of said clothing article  
opposite ~~the~~ said first attachment member; and  
providing at least one movement restrictor having a third attachment member for  
releasably engaging ~~the~~ said first or second attachment member on said exterior of said  
attachment member.
